style, function and quality

Electric V Desk - The Training Foundry Sheffield Hallam University

versatile & secure

As experts in creating secure workspaces NETCOM 92 can deliver the product combination that suits you best with style, function and quality. Whether you need to secure public access computing, provide a height adjustable desk option or save space through desking that transforms into an IT suite in seconds, NETCOM 92 have solutions to suit.

NETCOM 92's innovative Versatile Desking makes the most of your premium room space. Available in both manual and electrically operated versions, they convert from a standard secure desk to an IT station effortlessly.

stylish & robust

Available in a range of contemporary styles, shapes and finishes, NETCOM 92 desks are manufactured in the UK with excellent build characteristics and robust construction. Meeting all your workspace needs, NETCOM 92 also design and manufacture many other ICT and AV product ranges for use in health, education and libraries.

Desking with secure iMac shoe at University of Warwick

intelligent & space saving

NETCOM 92 offers a comprehensive range of contemporary desk designs, all providing superior security features.

Our standard, cluster, versatile and height adjustable desks integrate with our range of computer security cages to provide a secure and stylish solution for public access areas.

planning, design and installation

Library at UCL

London Metropolitan University

planning & design

The free, no obligation planning service helps clients work through the issues affecting the use, maintenance and design layout of a single room or an entire building with the added confidence that the eventual design will be delivered seamlessly from planning through to manufacture and installation.

modular & customised

The desk ranges can be combined to provide a consistent overall design. Available in eight stylish standard or cluster leg styles, when coupled with a variety of worktop shapes and optional electric lifting mechanisms the desks can be configured for any requirement.

In addition to the standard desk shapes, finishes and colours, NETCOM 92 offer a customisation service to meet your exact needs as well as a comprehensive range of accessories and other security products.

Manual V Desk

Manual V Desk - Height Adjustable

V range

Where space or multiple room usage is a priority the versatile range of V Desks can transform the area from workspace to IT stations in seconds. Available in electrically or manually operated models the V Desk secures and tidies screen and keyboard. It can be supplied as a single or double desk unit, as a fixed height desk in a choice of five legs styles or in a height adjustable version.

HA range

The Height Adjustable HA Desk can be combined with TOP-TEC secure computer and laptop units as well as the V Desk. The powerful electrically operated lifting mechanism makes the HA Desk suitable for a wide variety of uses and complies with DDA requirements.

versatility as standard

all NETCOM 92 contemporary desk designs provide SUPERIOR security feature for computers, laptops, keyboards, screens and all other media equipment

Standard Desk with PC cage

Cluster Desks with secure PC cages

standard range

Available in five contemporary leg styles
Standard Desks can be combined with security units for computers and laptops and come in a variety of shapes from straight to wave and corner.

cluster range

The Cluster range can be configured to meet an array of layouts including conference, hexagonal and octagonal. Available in three modern leg styles which integrate with the whole NETCOM 92 desk collection.
