

# NETCOM case study

## St Anselms Primary School

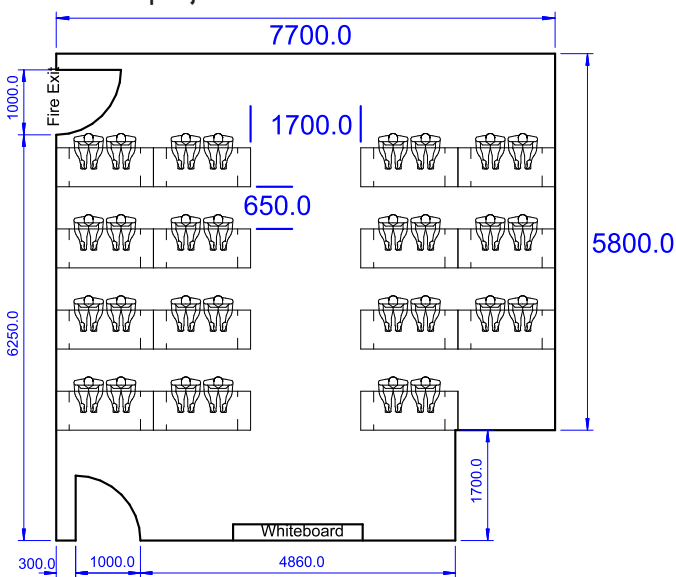

### The Requirement:

To completely re-develop the school's existing ICT suite to increase seating capacity from 15x Student workstations to 30x student workstation and a 1x teacher workstation.

St Anselms contacted Netcom after meeting us at the BETT show in Jan 2010. This project was located in the borough of Wandsworth.

### The Solution:

Netcom created a completely new room plan to achieve the number of workstation required. This also included a new containment system for data and power along with the re-location of the interactive whiteboard and projector.

### The solution included the following:

- 15x Double ICT Secure desks
- Rip out of existing data and power services
- 35x Cat5e data outlets
- 32x Twin Electrical outlets
- New 3 compartment trunking system to accommodate new data and power cabling.
- Re-location of existing IWB and projector including all local connections.
- 30x Dell Optiplex PC's
